Data finalised 30 April 2020.

## Foreword

As I write this, the steel industry around the world is grappling with the effects of COVID-19. The decline in global steel demand in the first half of 2020 is predictable but perhaps more painful as it came after slower than expected growth in 2019 due to the continuing manufacturing recession in the developed countries. However, it is possible that the impact on steel demand in the medium-term may turn out to be less severe than that seen during the global financial crisis in 2008/9. The steel industry remains at the core of a sustainable modern society and our products will form the basis for the economic recovery.

Meanwhile, the steel industry has reacted quickly and firmly, the health and safety of both our people and our customers being our top priority. The industry has put in hand all the required measures to protect people in plants and offices. Our plants have changed production to prioritise much needed equipment in the community from oxygen tanks to face masks to ventilators and the industry has made large donations to local hospitals and community support organisations. In these troubled times, we all pull together and support one another.

**Dr Edwin Basson**  
Director General

## Key points from this report

**A healthy economy  
needs a healthy steel  
industry.**

**Steel makes  
the future  
possible.**

## A healthy economy needs a healthy steel industry

Steel is essential to our society. As a permanent material which can be recycled over and over again without losing its properties, steel is also fundamental to a successful circular economy. From transport systems, infrastructure and housing, to manufacturing, agriculture or energy, the industry is continuing to expand its offer of advanced high-strength steels which reduce the weight of applications and encourage circular economy practices.

For society, the benefits include durable products, local jobs, reduced emissions and the conservation of raw materials for future generations.

## What makes up our steel use

## Steel makes the future possible

Steel will continue to be the backbone and enabler of society's evolution and progress. It will make the world a better place to live. Tomorrow's smart cities will be built on steel. As an infinitely recyclable and reusable asset, using steel helps to reduce the burden on the Earth's resources.

## World crude steel production 1950 to 2019

million tonnes, crude steel production

Years	World	Years	World	Years	World
1950	189	2000	850	2010	1 433
1955	270	2001	852	2011	1 538
1960	347	2002	905	2012	1 560
1965	456	2003	971	2013	1 650
1970	595	2004	1 063	2014	1 671

<sup>(e)</sup> = estimate

<sup>(1)</sup> Includes shares in AM/NS India and China Oriental

<sup>(2)</sup> Includes tonnage of Maanshan Steel and Chongqing Steel

<sup>(3)</sup> Includes tonnage of Nippon Steel Stainless Steel Corporation, Sanyo Special Steel, Ovako AB, and shares in AM/NS India and USIMINAS

<sup>(4)</sup> Includes tonnage of Serbia Iron & Steel d.o.o. Beograd and MAKSTIL A.D. in Macedonia

<sup>(5)</sup> Combined tonnage of Mobarakeh Steel, Esfahan Steel, Khuzestan Steel and NISCO

Notes on company ownership and tonnage calculations:

For worldsteel members, the data was sourced from their official tonnage declarations. For Chinese companies, the official CISA tonnage publication was used, unless especially noted. Figures represent consolidated tonnage ending 31 December 2019, including interests in subsidiaries and joint ventures.

For an extended company listing go to [worldsteel.org/steel-by-topic/statistics/top-producers](http://worldsteel.org/steel-by-topic/statistics/top-producers).

## Major steel-producing countries 2018 and 2019

**China**

## Steel production and use: geographical distribution 2009

### Crude steel production

World total: 1 239 million tonnes

Others comprise:

Africa	1.2 %	Central and South America	3.1 %
Middle East	1.4 %	Australia and New Zealand	0.5 %

## Steel production and use: geographical distribution 2019

### Crude steel production

World total: 1 869 million tonnes

Others comprise:

Africa	0.9 %	Central and South America	2.2 %
Middle East	2.4 %	Australia and New Zealand	0.3 %

### Apparent steel use (finished steel products)

World total: 1 153 million tonnes

Others comprise:

Africa	2.8 %	Central and South America	3.0 %
Middle East	4.0 %	Australia and New Zealand	0.5 %

### Apparent steel use (finished steel products)

World total: 1 767 million tonnes

Others comprise:

Africa	2.1 %	Central and South America	2.4 %
Middle East	2.8 %	Australia and New Zealand	0.4 %

## Apparent steel use 2013 to 2019

million tonnes, finished steel products

## World steel trade in products 1975 to 2019

million tonnes

Exports are of finished and semi-finished steel products. Production of finished steel, where not available from national sources, is calculated from crude steel production, taking into account the continuous casting ratio.

Year	Exports	Production	Exports share %
1975	114.7	506.9	22.6
1980	140.6	578.7	24.3
1985	171.0	599.0	28.5
1990	171.0	654.0	26.2
1991	177.1	660.0	26.8

Exports in World Steel in Figures include intra-EU trade, trade between countries of the CIS, and trade between NAFTA countries. The figures are based on a broad definition of the steel industry and its products, including ingots, semi-finished products, hot-rolled and cold-finished products, tubes, wire, and unworked castings and forgings. The above table comprises the exports of 62 countries, which represents approximately 96.5 per cent of total world trade in 2019.

## World volume of trade 2000 to 2019

Quantum indices 2000 = 100

## World trade in steel by area 2019

## Indirect trade in steel 2000 to 2018

million tonnes, finished steel equivalent

Indirect trade in steel takes place through exports and imports of steel containing goods and is expressed in finished steel equivalent of products used.

Further explanation on definitions and methodology of indirect trade in steel can be found in the report 'Indirect Trade in Steel (March 2015)' at [worldsteel.org/publications/reports](http://worldsteel.org/publications/reports).

Year	Indirect exports, Mt
2000	172.1
2001	178.1
2002	187.7
2003	199.1
2004	224.0
2005	249.2
2006	269.5
2007	292.4
2008	303.5
2009	231.4
2010	285.4
2011	323.8
2012	324.1
2013	319.1
2014	324.5
2015	322.3
2016	329.7
2017	341.4
2018	353.1

## True steel use 2012 To 2018

million tonnes, finished steel equivalent

Asia and Oceania	846.8	941.1	922.0	880.3	904.1	996.5	1 067.6
<b>Total<sup>1)</sup></b>	<b>1 360.6</b>	<b>1 466.8</b>	<b>1 463.1</b>	<b>1 410.3</b>	<b>1 424.4</b>	<b>1 537.7</b>	<b>1 610.7</b>

<sup>1)</sup> Total comprises 74 countries

True steel use (TSU) is obtained by subtracting net indirect exports of steel from apparent steel use (ASU). Total TSU is not equal to ASU because of differences in country coverage and methodological specifics of indirect trade in steel calculations. Further details can be found at [worldsteel.org/publications/reports](http://worldsteel.org/publications/reports).

kilograms, finished steel equivalent

## About us

The World Steel Association (worldsteel) is one of the largest and most dynamic industry associations in the world, with members in every major steel-producing country.

worldsteel represents steel producers, national and regional steel industry associations, and steel research institutes. Members represent around 85% of global steel production.

worldsteel's mission is to promote the steel industry and steel as a material, find global solutions to the environmental challenge, identify and analyse important megatrends, and encourage alignment between regional and national steel associations.

## Steel initiatives

### STEP UP

A multistep methodology aiming to improve the operational efficiency of steel plants globally.

### CLIMATE ACTION

Programme recognising steel producers that submit CO<sub>2</sub> emissions data to worldsteel.

### ONLINE BENCHMARKING SYSTEMS

Data collection systems covering reliability, process yield, and energy intensity.

### STEEL SAFETY DAY

Initiative aiming at reinforcing awareness of the five most common causes of safety incidents.

### LIFE CYCLE ASSESSMENT

Life cycle inventory data for 17 steel products updated on an annual basis.

### STEELIE AWARDS

Awards that recognise significant contribution to the steel industry in a series of categories.

### STEEL SUSTAINABILITY CHAMPIONS

Programme aiming to set higher sustainability standards for the steel industry.

### STEEL DATA VIEWER

Online interactive world map featuring steel production, trade and apparent steel use since 2000.
